## FOUR HORSES LOST IN FIRE AT SUMAS HOP GARDENS

Four work horses were burned to death, and the barn in which they were stabled, with harness, hay and other contents, the property of Canadian Hop Growers, Ltd., Sumas Prairie, were totally destroyed by fire which broke out at 5.30 last Saturday evening. Employees of the hop company endeavored to rescue the horses, but were driven back by the fierce flames. Origin of the blaze is not known. Partial insurance was carried.

## Village To Make Road Improvements

Laying of a drain to serve the lower end of Oscar street, and the Barrett and Hunt properties, was authorized by Abbotsford commissioners at Monday's meeting of the Council. The work will cost about \$100.

Roads of the village are to get immediate attention, it being decided to expend \$500 on this work. Among the thoroughfares to be improved are Essendene avenue east hill (Yale road), Hazel street, Pine street, Oscar street, and both the boundary roads.

Some pleasing Hollowe'en window displays have been effected in Abbotsford—stimulating a fuller appreciation of the occasion, and lending an attractive coloring to the town's business section.

Abbotsford school trustees met Tuesday evening to consider Inspector McKenzie's report, which is critical of certain teachers, and commends Principal Stewart, Miss Evelyn Nelson and Miss Stenson for the showing made by their classes. The Secretary was directed to write the various teachers in connection with this report.

## New Zealand goes in for Rabbits

One hundred of these chinchilla rabbits made a twelve thousand mile journey under the auspices of the Canadian Pacific Express Company from Lincolnshire, England, to Auckland, New Zealand, where they will form the nucleus of a rabbit farm. The express messengers disbursed one ton of feed to them during the voyage.

## Tally Ho! For the Royal York Course

This old-time stage coach will run twice daily from the new Royal York Hotel, Toronto, to the new Royal York golf course, which is under construction in the beautiful Humber Valley area. The coach originally belonged to Major-General Sir Henry Pellatt, C.V.O., K.C.M.G., and will be used for the conveyance of guests of the Canadian Pacific Hotel, who will call after the approved fashion of a by-gone day at the Old Mill for the refreshment of man and beast. The route will be via the Lakeshore Boulevard, Sunnyside and the Humber Boulevard.

## ESTIMATES 200 TON POTATO CROP IN THIS DISTRICT

Col. McLellan, Surrey Centre, assisted by H. Parr of the Delta and E. S. Plaxton, Abbotsford, is now managing the Mainland Potato Committee of Direction, succeeding G. P. Challenger, F. N. Sinclair and J. A. Catherwood. Mr. Plaxton has charge of the district embraced in Chilliwack electoral riding, and Mr. Parr the Delta district. An agreement has been effected with retailers and wholesalers, who have appointed a committee to assist and co-operate with the growers' body.

The wholesale price to the retailer has been set for the present at \$22 for netted gems and \$20 for whites. The wholesaler will work on a \$3 spread, and the retailer on a \$7 spread. Okanagan growers allow a \$5 spread to the wholesaler and a \$9 spread to the retailer.

Growers must observe the minimum price set by the Committee of Direction, and otherwise sell to their best advantage. License fees are scaled at \$1 for each five tons or fraction of five tons, i.e. \$2 from five to ten tons, \$3 from 10 to 15 tons and so on. Levy tags cost 75c for sufficient for one ton of potatoes, and obtainable at the Abbotsford Brokerage Co. office, Abbotsford. No salaries are paid the Committee members, their remuneration being 10 per cent. of license fees received, and 5 per cent. of tag sales.

Under regulations passed by the committee, the producer is licensed to market his products where he sees fit, provided he complies with the rules and regulations, and he can store where he chooses, provided he obtains a special license from the committee before shipping. All regulations refer to grades A and B. Grade C potatoes can not be sold. They are what are known as small, knobby and inferior.

Reports from Alberta indicate that Southern Alberta growers have sold out their crop with decreased production in that province, in Saskatchewan, Manitoba, and also here in B.C. Duty on Canadian potatoes entering U.S. is \$10 a ton, and American potatoes entering Canada pay \$7.50 a ton.

Mr. Plaxton estimates a saleable crop of about 6,000 tons of potatoes in this district.

Mr. Archie C. Stewart of Upper Sumas, has taken a carload of show sheep to Saskatchewan, to enter the winter fair circuit.

## Longer Hours And Smaller Staff At Abbotsford Liquor Store

Abbotsford's alcohol dispensary is now a one-man establishment, and will remain open until 7 p.m. for five days weekly, and until 8 p.m. on Saturdays. The store closes from 12 to 1 o'clock, noon. Jack Aitken, who has been assisting Vendor Rowley throughout the summer, is returning to his ranch at Poplar.

A private syndicate is submitting plans to the provincial government for the taking over of Sumas reclaimed lands. Leon J. Ladner and C. J. B. Fell are representing the negotiating concern, whose plans are being treated confidentially.

THAT "SILVER" WILL BE YOURS IN WORTHWHILE SAVINGS FOR "PICKING-OFF" SOME OF THESE MONEY-SAVING VALUES. JUST LOOK OVER SOME OF THE ADS.—CAN YOU DO BETTER IN THE CITY, OR FROM A CATALOGUE?

Read the  
Paper

It is fully expected that the Great Northern Railway will apply to the Board of Railway Commissioners for permission to abandon their line between Abbotsford and Colebrook within the coming year. Within three months the heavy freight business now given the G.N.R. by the Clayburn Company will be diverted over the B.C. Electric, and the railway company will then be in a position to proffer figures of traffic and freight volume to the Railway Board with confidence of a favorable hearing.

## WORLD HAPPENINGS BRIEFLY TOLD

Old Age Pension legislation for Ontario is not likely to be enacted next year, but will be one of the government's main planks in its coming election campaign.

Baron Von Huenfeld, German flier, who stopped over at Constantinople on his flight from Germany to San Francisco, revealed that Germany is planning an air line to China.

General Umberto Nobile has announced he would go into seclusion at the home of a friend in Naples soon to write the complete story of his recent Polar expedition.

A fitting ceremony marked the unveiling of a granite cross at Ile Aux Coudres, Quebec, commemorating the first mass ever said in Canada, by Jacques Cartier, on September 6, 1535.

Sir Henry Thornton while in Norway was accorded an audience with King Haakon, the latter displaying much interest in the progress of Norwegianians in Canada and in Canadian conditions generally.

An all-Canadian telephone service, Winnipeg to Montreal, has been established via Port Arthur and Fort William, a distance of 1,600 miles. Heretofore, a connection between these points has been made through the United States.

The Department of National Defence, Ottawa, has placed an order with the British firm of Armstrong-Whitworth for five Siskin fighting planes to cost \$130,000. This will bring the government fighting planes to thirteen.

A steel mill worker, a miner, a postal employee, an engine fitter, two clerks and a chocolate maker, were among the students who recently gained the Oxford University Diploma in Economics and Political Science.

Max Heinrich told the Congress of Natural Science at Hamburg, Germany, that Dr. Alois Fisher, a Viennese chemist, had been successful in alloying radium with platinum, thereby increasing tenfold the ways in which radium could be used.

## An Ancient Pastime

Game Similar To Squash Played 2,000 Years Ago

Evidence that a game similar to squash was played by natives of Yucatan 2,000 years ago was found by a Tulane University expedition which returned home from an exploring trip through Central America and Mexico.

Dr. Frans Blom of the department of Middle American Research of Tulane, who headed the expedition, said he found courts upon which the game had been played by the ancient Mayan tribes. The courts still were in excellent repair, he said, and there could be no mistake about what they were used for.

The game apparently had been played with rubber balls which had been knocked back and forth across the court with something similar to rackets.

## Our National Buffalo Herd

Buffalo National Park, with its area of 197.5 square miles, is the home of Canada's national buffalo herd, there being a little over 5,000 of these animals now in the park. Moose, elk, mule deer, antelope and yak are also in the park.

We reckon if a kid could choose his own mother it wouldn't take him long to make the choice between one who could bake cookies and one who always knew what kind of bid to make when she had two five-card suits.

## "HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable. I was weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicine have helped me wonderfully."—Mrs. Wm. H. BRECHTEL, Box 143, Port Colborne, Ont.

W. N. U. 1753

## The Peace River

Success Being Achieved In All Branches Of Agriculture

The eyes of agriculturists are now turning to the Peace River country, where the winters appear to be comparatively mild, and where wheat, oats, and timothy seed can be grown and take prizes in world competition. In this wonderful stretch of country often by the middle of April the winter grains and grasses are greening, and the first week in May sees the tulips and hyacinths in full bloom.

Summer temperatures range around 90, and though early frosts are at times experienced, harvesting is usually well in hand by the first week in September. Some splendid wheat yields were reported a year ago in the Grande Prairie and Valhalla districts running from 42 to 70 bushels to the acre.

The work done on the Beaverlodge Experimental Sub-Station is fully set forth in the report of that station which is available for distribution, and may be had on application to the Publications Branch, Department of Agriculture, Ottawa. The Peace River country is developing very rapidly, and the agriculture practiced is very diversified. Success is being achieved in all branches including grain, dairying, poultry and bee-keeping.

## British Harvesters And Red Cross

In War And Peace The Red Cross Is Still Serving

"Ready for service" is the proud boast of the Red Cross the world over, and in countless ways, unseen by the man in the street, the Red Cross is found to be "still serving."

A large party of British harvesters in the west found themselves stranded in the city of Calgary. Their immediate need was shelter for the night and the friendly hand. Cool weather and early frost necessitated the provision of warm bedding for these strangers within the gates.

The Red Cross of Alberta gladly came to the rescue and was able to co-operate with the Salvation Army in the problem of getting the men comfortable for the night, by supplying each and all with warm bed-clothing.

Thus in the unknown byways of the world by little deeds of kindness were these weary travellers reminded that the Red Cross, their friend in war time, was still anxious and ready to be their friend in times of peace.

## NEW BEAUTY FOR YOUR CLOTHES

By Mae Martin

You can look attractive and stylish on less. Learn how to give new beauty and variety to your dresses and add individuality and charm to things around the home by the quick magic of tinting and dyeing. Perfect results are possible only with Diamond Dyes. Each package represents the perfection of 50 years of dye-making. They never streak, spot or run. They are real dyes, like those used when the cloth was made.

Diamond Dyes are easy to use. The "know-how" is in the dyes. Fashionable tints appear like magic right over the out-of-style or faded colors. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

## Predicts Speed Highways

Dr. Doolittle Thinks Canada May Copy One Proposed In England

Highways where the speed of vehicles will be at least sixty miles an hour are to be a development of the near future, predicted Dr. J. P. Doolittle, Toronto, referring to the proposed new highway between London and Brighton, England.

The road as proposed is to consist of separate ways for traffic headed in each direction, and from it all slow-moving vehicles will be barrel. This will give speed for the fast moving traffic and take it off the roads in use for the slower trucks and other vehicles.

"As we see things now, such developments have to come here in Canada and the United States as they are coming in Europe," said Dr. Doolittle. "We are just at the beginning of the motorized age, and with a view to ease and safety of control, and with still further development certain to come, higher speed traffic will be recognized and provisions made for its accommodation."

Officials of the department of highways said that such a project has never been seriously entertained in Ontario, and that it would be many years before any such development would take place.

"We are reaching a higher speed age," said one of them, "but I think we have yet to see whether we are going to make that higher speed on the ground or in the air. There is one such road in operation, between Rome and Milan, Italy, I think, but so far such developments are rather in the nature of experiments."

## Reason Honey Is Valuable As Food

Scientists Find It Acts As Its Own Disinfectant

When the National Beekeepers' Association offered \$1,000 several years ago to the man who could approximately imitate the work of the bee in the production of honeycomb it was not anticipated that any one would soon collect the money. The beekeepers knew their bees. The \$1,000 is still waiting.

Scientists are fascinated by the systematic life of bees and are beginning to discover some new facts about their product. One reason for the value of honey as a food for man has been found out. Old-time beekeepers have always known that if honey is placed in a barrel not thoroughly dry the seams will open and the honey will run out. Science has discovered that it absorbs the moisture from anything damp with which it comes in contact. It draws moisture from the staves of the barrel.

Further investigation of this characteristic revealed that the lack of any form of bacteria in honey is caused in the same way. An unlucky microbe falling into a honey pot dries up and dies. Honey is its own disinfectant. It is one of the safest foods in the world. Sealed in the waxen cells of the comb, it is kept clean and pure, and when it is extracted and exposed to the air it kills any dangerous organisms falling into it by absorbing their liquid content.

## Would Be Grand Walk

A temperance lecturer was holding forth and saying that if all the public-houses in Scotland were placed side by side they would line a road stretching from Glasgow to London. This item was received with interest by his audience, one of whom remarked to a friend, "Eh, Jock, what a grand walk!"

"I wonder if that old fat girl is trying to flirt with me?" "I don't know, but I can easily find out by asking her—she's my wife."

## Exercise

You need a cool and soothing rub down with Minard's Liniment after any form of exercise.

## A NEW GIANT OF CANADIAN BUSINESS

The Highway Branch of the Department of Railways and Canals has estimated that somewhat over \$275,000,000 (276,288,140) was spent in Canada in 1927 by tourists from abroad. It takes some effort to appreciate the real value of this tourist

growing source of wealth. And the building industry is another factor that powerfully influences the activity of Canadian business.

Standing up alongside such items as these, the tourist trade can today claim a clear title to a place among

business—a phase of Canadian trade which was almost ignored a few years ago.

Wheat is easily the largest single item of the Dominion's export trade. The pulp and paper industry is, in point of value of output, the country's greatest manufacturing enterprise. Mining is a huge and rapidly

Canada's chief business interests. And it is a form of development to which Canada can look with every assurance of further great and long-continued growth, for as regards natural attractions for outdoor recreation Nature has placed the Dominion permanently among the "most favored nations."

## British Columbia Apples

Will Be Marketed In New Way From Coast To Coast

British Columbia apples are now going to be marketed in an up-to-date way from coast to coast in all the larger cities of Canada, it is announced by W. McL. Cooper, general manager of the Eden Apple Service, a subsidiary of the Associated Growers of the Okanagan, following meetings with Victoria and Vancouver wholesalers. Under the new plan British Columbia apple service stations will be established in all the chief cities where apples will be kept cool and in best condition. British Columbia apples will be distributed from these stations in a new style, half dozen and dozen cartons for the small buyer. All selling will be done through retailers, who will be supplied daily.

## Sailor Aided By Wireless

Injured Man Transferred From Freighter To Hospital On Liner

Value of wireless communication at sea was brought home to at least one sailor of the small freighter, Blarholm, outbound Halifax to Glasgow, when his hand was injured badly. A wireless call from the Blarholm conveyed the news that one of the crew needed medical aid. The message was caught by the operator on the White Star liner, Megantic. Captain Kearney immediately turned to find the freighter. A boat was launched and the stricken sailor was taken aboard the big liner where he was attended by Surgeon Glover, who amputated a finger, after which the sailor was carried in the liner's hospital to Southampton.

## Should Speak English

Many Americans, says the Chicago Post, are inclined to be lenient towards foreign immigrants who live in colonies and make small effort to learn English beyond the little that is essential for outside communication, but this view is wrong. An ability to read as well as to speak English intelligently should be required before they are admitted to citizenship.

## Airport For Banff

An effort is being made to establish an airport at Banff. Government officials have inspected a site near the present golf links and the prospect that a field will be prepared within the next year is bright.

## WILL FILL IMPORTANT ROLE

Britain's First High Commissioner To Canada Should Be Helpful To Both Governments

Sir William Clark, who has arrived in Canada to serve as Britain's first High Commissioner to this country, will fill a very important role and one that gives promise of being valuable to both countries concerned. As Sir William himself has declared, he will serve as an additional channel of communication between the Ottawa and London governments, "two governments," he adds, "serving equally the same king and governing nations within one and the same Empire."

Britain's High Commissioner to this country should be able to offer important advice to the British Government on a number of matters that will inevitably arise. There is, for instance, the question of immigration. The question of British immigration into this country is perhaps the most important one so far as the two governments are concerned. The new British High Commissioner, who is a trained observer of all economic questions, should be helpful in solving this difficulty. He will be in a position to advise the British Government as to Canada's powers of absorption, as to just what type of immigrant this country requires; indeed he should be in a position to advise with accuracy, and with a full knowledge of all aspects of the situation, both the British and Canadian Governments on this important question. In fact, it is just possible that this new link between the two countries which has been created is just what is necessary to render a problem no longer a problem.

On other matters, too, Britain's High Commissioner to Canada should be of distinct service. Sir William Clark gives promise of being an ideal man for the post and Canada will welcome him heartily to her shores.

## Becoming More Important

Inasmuch as motor traffic is not only vital to the prosperity of the country, but is more general than any other form of transportation outside of railroads, which run in their own right-of-ways, uniform control and reasonable speed regulations become every day more vitally necessary.

The principles of mass production were seen and practised more than a century ago, and have been in continuous use ever since.

## FAMOUS WRITER OF DOG STORIES

Albert Payson Terhune, dog fancier and writer of nature stories, is reported to be the man who halted the 153-mile marathon swim of the police dog Lucky, after it had completed the first 58 miles from Albany to Poughkeepsie on its way down the Hudson River to New York.

## WORK PRACTICALLY FINISHED

Headstones Have Been Provided For Every Grave On Western Front

The headstones for the last grave in the cemeteries on the Western Front has been shipped to France by the Imperial War Graves Commission. Since the work was first started by the Commission between 600,000 and 700,000 headstones have been sent to France and Belgium. Most of these have been erected, but a few still remain in the cemeteries awaiting erection. Although headstones have now been provided for every grave on the Western Front, it is possible that more will be required, as bodies are still being found in the battlefields.

All these stones have been quarried in England by ex-Service men and prepared here before being shipped to the Western Front.

Some of the cemeteries have been selected to contain memorials to the missing. All those men who fell during the war, and who have no graves, will have their names placed on these memorials. Nine memorials to the missing are in the course of construction at the present time and five have been completed and unveiled. A memorial to members of the Air Force who were reported missing on the Western Front is being erected in the Faubourg d'Amies, and on it about 35,000 names will be inscribed.

In a statement an official of the Imperial War Graves Commission said that it was hoped that the memorial at La Fertes-Jouarre, which will contain 3,888 names, and which commemorates the missing at the retreat of Mons, will be ready for unveiling by the end of October. This memorial will also include the names of those who were missing in the battle of the Marne and the Aisne.

Between 11,000 and 12,000 officers and men of the Mercantile Marine who died as the result of enemy action and who have no known graves are to be commemorated on Tower Hill. The design by Sir Edward Lutyens is a great vaulted corridor, in whose three bays the names of the 11,000 are being inscribed.

## Recipes For This Week

(By Betty Barclay)

### ORANGE CUSTARD (Serves 7)

- 2 cups Borden's St. Charles Milk.
- 1 cup hot water.
- 8 tablespoons cornstarch.
- 3 eggs.
- 1/4 teaspoon salt.
- 1/4 cupful cold water.
- 3/4 cup orange juice.
- 2 tablespoons lemon juice.
- Grated rind of one orange.
- 1 cup sugar.

Mix cornstarch, sugar and salt, dilute with cold water. Add to scalded milk and hot water, stirring constantly until mixture thickens, afterwards occasionally; cook fifteen minutes. Add orange juice and slightly beaten eggs that have previously been mixed; mix thoroughly and lastly, add the lemon juice and orange rind. Cool and serve.

### CARAMEL CUSTARD (Serves 6)

- 1 tall can Borden's St. Charles Milk with enough water to make 1 quart.
- 5 eggs.
- 1/2 teaspoon salt.
- 1 teaspoon vanilla.
- 1/2 cup sugar.
- 1/4 teaspoon nutmeg.

Gradually sift sugar into a hot skillet, shaking the skillet vigorously all the time to prevent burning. The sugar should melt about as fast as it is sifted into the pan. When it turns to an amber color (a light resin color) set on back of stove and add milk, being careful that milk does not bubble over, as is liable on account of the high temperature of sugar. As soon as the sugar is melted in the milk, add mixture gradually to eggs slightly beaten. Add the salt and flavoring to egg and milk mixture. Bake in custard cups in a moderate oven.

Frenchman (sternly, to fellow-countryman who has become a naturalized British subject): "What have you gained by becoming naturalized?"

The Other: "Well, in the first place, you see, I win the battle of Waterloo."

Over \$900,000,000 is invested in hydro-electric power plants in Canada and it is estimated that \$80,000,000 is being spent this year in additional development.

Forest fires in the United States cost nearly \$100,000 a day.

"We have got a new baby. It is a girl."

"How do you know?"

"It is powdered every day."—Lustige Kölner Zeitung, Cologne.

## THE TOOTH "NERVE"

You know, of course, that a tooth is not solid right through, but is hollowed out in the centre to form a chamber; and because of sad experience perhaps in a dental chair, you have been made aware that a tooth does possess a "nerve."

But you gave no thought possibly as to whether this chamber contained other forms of tissue or not. Now, as the so-called "nerve" is known as the pulp, which tissue is a mass of almost gelatinous character containing minute blood vessels and nerve filaments.

So it is not just a glistening string like piece of nerve tissue as you may have supposed.

When the tooth erupts, the pulp chamber is proportionately large, but with the tooth practically fully formed, the need for tissue forming elements is largely past. So the blood supply is cut off more and more with a progressive narrowing of the pulp chamber, until in advanced life, it is sometimes altogether obliterated.

This accounts for the fact that tooth decay can move very quickly down the shaft of the tooth than in the adult's.

You read the dental engine, and at the first touch of the "drill" to the tooth, you are sure the dentist has struck the nerve because of the pain produced.

However, this sensation is being carried merely by minute fibrils that lie in the dentinal structure, while the pulp containing the nerve proper has gone undamaged.

Remember this: that the power of healing in the pulp is very low and once infected, the chances of its recovery to health are extremely slight.

For which reason you should be on your guard to head off tooth disease in its earlier stages.

## An Interesting Collection

Figureheads Of Old Warships Can Be Seen In England

At Castle's Yard, Millbank, England, is preserved the most complete collection of figureheads of old wooden warships—some of them dating back to Nelson's time—extant in England today.

Here may be seen figureheads from the Hood, Cressy, Bristol, Collingwood, and many other famous ships, carved out of timber and painted and gilded by men who were artists in their craft.

One very fine example is the Highlander that once belonged to H.M.S. Edinburgh. Another is a gigantic head of the Duke of Wellington, measuring nearly four feet from forehead to chin. The ship which this adorned was launched on the day the Iron Duke died. Another interesting exhibit came from the Fighting Temeraire, Turner's famous picture of which hangs in the Tate Gallery near by.

## Death Of Sir Horace Darwin

Sir Horace Darwin, son of Charles R. Darwin, who wrote the "Origin of Species," died recently at Cambridge, Eng. Sir Horace, who was himself noted as a scientist, had been in failing health for some time. He had invented and constructed many delicate seismological and aeronautical instruments.

Mandy: "Rastus, you all reminds me of one of dese flyin' machines."

Rastus: "Why, 'cause I see a high-flier, Mandy?"

Mandy: "No, 'cause you ain't no good on earth."

The smallest race of people live on the Andaman Islands in the Bay of Bengal, near Burma. Their average height is less than four feet.

### CHAPTER II.—Continued.

The next day, dressed in light clothing and a pair of running shoes, Donald went around Stanley Park. Wishing to condition himself, he ran the greater part of the way.

Spring comes early in Vancouver as compared with the East. In January the buds are bursting in Stanley Park. The balmy sea air, scented with earthy odours from the deep woods, seemed to Donald to possess magic properties. The blood sang in his veins. Overhead, big white seagulls screamed and soared; squirrels retreated in chattering fright as he raced down the road, and over all was the sound of the booming surf. The wind rushed past his ears, and he shouted aloud from sheer exuberance of spirits and the joy of living.

Donald covered the distance from English Bay to Granville Street at a jogging trot. The air of the gymnasium seemed close after being in the open. The big Australian fighter was in the ring with one of his sparring partners. The slap of gloves was like music to Donald's ears.

"Just in time," welcomed Andy as he led him to the dressing-room, where he quickly shifted to fighting togs and then walked over to the ring.

A crowd of boxing-fans sat by the ring-side watching the big fellow work out. Donald's entrance caused a stir. His lithe, muscular body was the attraction of all eyes.

"Op in," commanded Andy.

While an attendant was putting on his gloves, Donald studied the big man he was to help train. He would weigh at least two hundred pounds. His shoulders were enormously broad and square, and the muscles of his arms stood out in knobs and bunches. His face was a pasty colour, as though his training had been done inside. His jaw was square and strong, his eyes a mild blue, and his nose looked as though it had stopped many a solid punch. "Strong but slow," Donald decided.

When Andy introduced him Hagin merely grunted. To the fighter Donald was simply one more punching-bag.

Donald turned to Andy. "What do you want me to do?" he asked.

"Oh, knock the blighter out of the ring," rejoined Andy, with just a touch of sarcasm.

"Do you mean that?" queried Donald quickly.

Andy nodded.

Hagin came to the centre of the ring, assuming an awkward crouch, his arms wound about his face. Donald circled him warily. The big man feinted with his left. Donald danced within range, and the Australian let loose a terrific right swing that would have felled an ox. Donald sidestepped, jabbed his left twice to his opponent's face, and his right missed Hagin's jaw by the fraction of an inch. A surprised look came over

the big man's face. A murmur of applause came from the audience.

"Strike me pink! What a left!" ejaculated Andy. Hagin scowled and tried to bring the fighting to close quarters, but was easily avoided by his lighter opponent.

Donald now took the aggressive. His left found weak spots in the big man's defence, and repeatedly he sent in stinging jabs that drove his adversary's head back with a snap. Try as he might, Hagin could not get away from that whizzing left. It is a bitter pill to be bested by one's sparring partner. So far the Australian had been given a boxing lesson. He forced Donald into a corner and made for him savagely. Donald ducked under the flail-like swings, and shot a left upper-cut to Hagin's jaw. The latter staggered weakly to the ropes. Donald was after him like a flash. Just then he saw Andy gesticulating wildly and shaking his head. Hagin lunged forward and Donald fell into a clinch. The gong rang.

"What's the trouble, Andy?" asked Donald as he reached his corner.

"Strike me lucky!" whispered Andy hoarsely. "You're punchin' me meal-ticket. You're makin' a blinkin' boob out of me 'cavyweight."

"You told me to knock him out of the ring," reminded Donald.

"Sure I did. But 'ow the 'ell did I know that you were a blinkin' cyclone? Strike me blind, a left 'and like that I 'aven't seen since I 'anded Young Griffo."

"What shall I do in the next round?"

"Tie a punch and go down—'urt your 'and—anything to quit. But for 'eaven's sake don't mess up me 'cavyweight any more! If the public ever 'ears of this our big fight is all off!"

In the next round Donald dropped to the floor as they broke from a clinch in the centre of the ring. He rose to one knee, holding his hand and making a wry face.

"Too bad," sympathized Andy as he ordered him to the dressing-room.

As Donald stepped from the ring he was intercepted by a curly-haired youth whose brown eyes sparkled with enthusiasm. "By golly, I want to know you. My name's Douglas Rennie. My, but that was a wonderful fast exhibition you gave us," he ejaculated, gazing at Donald with undisguised admiration.

Donald flushed. "I appeared fast," he explained modestly, "as I was against a very slow opponent. I know nothing of Garrieau, but he won't be to be very clever to beat the Australian."

"Garrieau is fast and carries a knockout in either hand."

"I'm sorry for Andy's man if that is the case, as any kind of a left will beat Hagin. Come to the dressing-room," invited Donald.

A moment later Andy entered and sank dejectedly to a locker seat.

"You look rather blue, Andy," observed Donald.

"I am. All 'ell's a poppin'," admitted Andy.

"What's wrong?"

"I've lost me 'cavyweight. 'E's quit."

"Why?"

"Said I framed on 'im by sending you in this afternoon. Said I 'urt 'is pride."

"Pride!" echoed Douglas sarcastically. "You've been treating him too well. I never thought much of him as a fighter. You're too good a trainer to be wasting your time on third-raters."

"Maybe you are right," conceded Andy, "but look what a blinkin' mess I'm in now! 'Ere I am in the 'ole three hundred bones for training expenses, and I've put up a forfeit with the promoters for appearance. I'll lose the 'ole lot." He threw out his arms with an air of resignation and sank back in his seat.

Little Andy presented a pitiful figure as he sat hunched in the corner—his jaunty manner gone; his blond head, usually held at a saucy angle, sunk on his chest. Gloom, deep, impenetrable gloom, enveloped this bright spirit from the Antipodes.

Donald knew now that for all Andy's munificent manner of yesterday, the three dollars to "eat on" and the sorely needed dinner he had bought, had come from a generous heart, but a depleted purse. Here was his benefactor in trouble. How could he help him? He crossed the room, sat down beside Andy, and placed his hand on the little man's arm.

"Andy, take me on. I'll fight Garrieau for you."

Andy came to his feet with a jump

## How to Make Rice Pudding

**A TESTED RECIPE**  
 That Adds New Flavour:  
 4tblspns. rice 2½ cups Borden's  
 1½ cup sugar St. Charles Milk  
 ½ tspn. salt 1½ cups water  
 Nutmeg  
 Wash the rice thoroughly, then add with the sugar and salt to the milk diluted with water. Pour into a buttered baking dish and add a sprinkling of nutmeg. Set the dish in a pan of hot water and bake three hours in a slow oven (300° F.) stirring several times the first hour to prevent the rice from settling to the bottom. Serve hot or cold.  
 For Free Recipe Book, Write The Borden Co., Limited, Montreal, 708  
**Borden's ST. CHARLES MILK**  
 Unsweetened

and seized Donald by the shoulders.

"If you'll do that, me lad, I'll be your pal for life. Strike me pink, did you 'ear that? I've got a real fighter at last! 'Ooray!" The little fellow was in ecstasies. "We'll clean Garrieau up," he went on excitedly. "And then I'll take you to the Stytes, and then to Austrylia, and..."

"Hold on," interrupted Donald laughingly, "looks like you intend making a professional pug out of me. I'm doing this to help you, Andy and," flushing in spite of himself, "I'm broke."

Andy glanced over Donald's tall figure with a professional eye. "You 'ave a week to get fit, and 'as you 'aven't 'ardly any weight to tie off, you should be top 'ole in that time."

"May I work out with you?" asked Douglas eagerly.

"Glad to have you," replied Donald.

A few minutes later the young men stepped to the street. Douglas seemed loth to go.

"Will you come to my home for dinner?" he invited.

Donald hesitated. It seemed ages since he had entered a private house. He glanced down at his only suit, which was rather seedy, then looked up, to find the usually roguish eyes of his companion fixed upon him seriously.

"Thanks, old man. I hope I may have the pleasure at some time, but I can't do it now."

"You said you were broke," began Douglas, hesitatingly. "Can—I—"

"No, no, I'll see you tomorrow," interrupted Donald, turning abruptly and walking swiftly down Granville Street.

Douglas stood watching him until he disappeared. "A mighty good sport," he said softly.

(To Be Continued.)

Externally or Internally. It is Good When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

### Censored The Temperature

Chinese Newspapers Decreased Figures So People Would Work

The temperature was censored in Hankow recently. A hot spell caused a newspaper controversy over the heights attained by the mercury, and the charge was made that the figures were deliberately decreased.

Each day the weather apparently had been getting hotter, and each day the public scanned the temperature in the newspapers, only to find it just one or two points below 100. A reporter was sent to investigate, and the Chinese authority informed him: "If we put the figure at more than 100 the public will think it is too hot and not work so hard."

This was duly published. The next day the aggrieved authority refused to give out any figures on temperature or water marks, and for a day the public had to depend upon their home thermometers. However, an outcry in the public press forced the "censorship" to be suspended after one day.

### Farmers Rebel Against Soviets

Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisition of grain, is reported by persons arriving from the Ukraine, South Russia. Dissatisfaction has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

L. H. Newman, Dominion cerealist estimates that within three years Western Canada will have a rust-resistant wheat which will grade as high as the varieties now being grown.

He: "You know, dear, we have had our new home just 12 months."

She: "Gracious! And it seems like a year."

Boss: "Yes, I want an office boy. Do you smoke?"

Boy: "No, thank you, sir, but I don't mind having an ice-cream cone."

"How's your wife coming along with her driving?"

"She took a turn for the worse last week."

### New Camera Loaned To Byrd

Invention Of Naval Officer Simplifies Map Making From Air

A new kind of camera, which will record in a small, snap shot picture, its own position on the earth's surface, has been perfected at Rochester for the United States navy. It was loaned on August 2 to Commander Byrd, for use during his Antarctic expeditions.

The camera is the idea of Commander M. R. Pierce, of the U.S. Naval Air Station at Lakehurst, N.J., who collaborated with the Eastman Kodak Company in perfecting and building it. Commander Pierce loaned it to Byrd. Its name is the Pierce sextant camera.

A very important possibility of this camera to the Byrd expedition, Commander Pierce said, would be to establish definitely the location of spots on the Antarctic continent photographed from the air in the process of map making. Whenever the airman makes a picture with a mapping camera, he may also make an exposure with the sextant camera, and thus the exact position of the points photographed will be determined, and the process of sutting them together into a map will be greatly facilitated.

After a test made at Rochester Commander Pierce said he had established the accuracy of the camera to within half a second. Apart from Commander Byrd's use of it, the camera will be available in ordinary navigation because an observation with it is more rapid than one with an ordinary sextant, and is easier to read by those less expert in taking sights.

### BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and soothe the stomach, thus driving out constipation and indigestion, colds and simple fevers and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes: "I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Good Roads Necessary

One Thing Country Cannot Afford To Do Without

The world is now moving on wheels and a province that does not provide the facilities for allowing the wheels to turn will be left far behind in the march of progress. The roads that will have to be built in Western Canada to keep these provinces anywhere in line with the states to the south will cost a great amount of money. The point is, however, that while you may afford to do without some things good roads are not one of them. The money spent on roads, if expended wisely, will earn dividends. Good roads that will permit free flow of traffic in all kinds of weather are as essential to the business of the modern community as telephones, telegraphs and railways.

### It May Be Urgent

### When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

W. N. U. 1753

# "RED ROSE TEA" Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

## T. H. ESTABROOKS CO., Limited, Winnipeg

### Machine For Writing Music

Frenchman's New Invention Has Twelve Letters and a Set Of Figures

Will symphonies and sonatas of the future, not to mention blues and ragtime, be written on a typewriter? Will the Beethovens of tomorrow dictate to a stenographer or the Irving Berlins while their creations to the clicking of a machine?

Paul Bonnard, a Paris lawyer, thinks the answer is in the affirmative. He has just obtained a patent on a typewriter for writing music. According to the inventor, the most complicated music may be recorded on his machine just as effectively and much more rapidly than by the old style of writing it out by hand. By the Bonnard system each note in the octave is replaced by a letter. A figure on the left would mark the first note of an octave, while a figure on the right would indicate the tempo. The inventor declares that twelve letters and an ordinary set of figures are all that are needed to record the most intricate musical composition.

In announcing his invention to the world M. Bonnard says that he expects to hear much criticism and doubt expressed, but holds himself at the disposition of all enquirers. In addition to being a lawyer M. Bonnard also holds the degree of Doctor of Philosophy.

He throws doubt on the usefulness of his invention by the statement that the widespread use of his typewriter would lead to the production of much more music, apparently placidly emphasizing on quantity rather than quality. But, he argues, the same can be said to the effect of the ordinary typewriter on the production of literature.

### Turks Learning New Alphabet

Public Squares In Constantinople Turned Into Huge Classrooms

Thousands of tradesmen have closed their shops and an equal number of business and professional men have deserted their offices in the Anatolia section to learn the new Turkish alphabet, with President Mustapha Kemal Pasha of Turkey as teacher.

Public squares have been turned into huge classrooms and great blackboards have been erected for the use of the president.

Sitting cross-legged Turkish fashion, on the ground, or standing in circles, the butchers, bakers and candlestick makers of the entire region are slowly learning the Latin characters which by law have replaced the Arabic characters of the Turkish language.

The president of both Sivas and Tokat called individuals from the crowd to practise on the blackboard what he had taught them.

A butcher at Sivas was taught in a few minutes to write his name in Latin characters. Keyboards of the characters already have been placed on typewriters, eliminating the Arabic characters from much of the business correspondence.

It is estimated that the average cost of running an auto is \$229 a year, of which \$101 goes for gasoline and oil.

"Does your husband lie awake at night?" "Yes, and he tells them in his sleep, too."

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

"Mechanical ears," perfected in England recently, "heard" a gun fired 13½ miles away.

A cynic is a man who believes that a man doesn't have to be a bigamist to have one wife too many.

### Little Helps For This Week

"Lord, teach us to pray."—Luke XI.

1. O Thou by whom we come to God,—The life, the truth, the way! The path of prayer Thyself hath trod; Lord, teach us how to pray.  
 —James Montgomery.

Wherever there is religion there is prayer, and wherever there is a religious soul there is heard the language of prayer.  
 —Francis B. Hornbrooke.

Prayer mustna undervally prayer. Prayer mayna bring money, but it brings us what no money can buy,—a power to keep from sin, and to be content with God's will, whatever He may please to send.—George Eliot.

The Man With Asthma, almost longs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

### Rather A Hard Job

An Irish county council were in discussion over the provision of a new bridge in place of an old one.

These extraordinary propositions were submitted at the meeting by one of the members:

- (1) That the old bridge be removed and a new one built in its place.
- (2) That the materials of the old one be used in the construction of the new bridge.
- (3) That the old bridge be left standing until the new one is completed.

Headache? Relieve with Minard's Liniment.

Lake Balkal, in Siberia, is 4,500 feet deep.

## EVEREADY Radio Batteries

—they last longer

Use Eveready Layerbilt

"B" Batteries for Economy

Here is positively the lowest-priced, satisfactory, longest-lasting "B" power you can buy.

Eveready Layerbilt batteries completely meet the "B" power requirements of every radio receiver. Three sizes—large, 45-volt; medium, 45-volt; small, 22½-volt. All Eveready Layerbilt quality at new low prices.

Equip your radio set with Layerbilt batteries and enjoy many months of carefree, better reception.

## Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

For many years we have specialized in Canadian and Imported WOOLLENS and this Fall offer you a fine selection including Underwear, Hose, Gloves, Vests, Scarves, Baby-wear, Sweaters, Shirts, Etc. at the LOWEST PRICES in this district

### SYNOPSIS OF LAND ACT AMENDMENTS

#### PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes and which is not timber-land, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres before a Crown Grant can be received. For more detailed information see the Bulletin "How to Pre-empt Land."

#### PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands not being timberland, for agricultural purposes; minimum price for high-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stampage.

#### HOUSING LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

#### LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

#### GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on number, range, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers up to ten head.

#### CONFIDENCE

PUBLIC Confidence is not easily won. It is a reward only received after years of honest, conscientious service—and when given, must be most carefully guarded.

You may entrust your business with the undersigned, confident that your interests are always protected—in the most reliable companies, and by the soundest of securities.

### MATSQUI FAIR ASSOCIATION DISBURSES \$1590 REPORT SHOWS

Matsqui Agricultural Association wound up the most successful year in its history at a meeting held in Gifford Hall last Thursday, when the Secretary reported disbursements of \$1,590 with assets of an increased value of about \$500. New additions had been made to buildings on the fair grounds, Secretary Leach reported, and fixtures had been built for the Matsqui exhibit placed in New Westminster fair. Paid-up memberships for the year commencing in September of this year totalled 1707, advertising returns from the prize list—the largest and best prepared in the Fraser Valley—amounted to \$115, only \$50 less than the printing bill for the entire year, the Secretary reported. Some criticism was levelled at Secretary Leach because he refused to accept entries on the day of the fair, but he stated that the regulations were quite clear in this matter, and he saw no reason to break the rules, as he had been requested to do by certain directors.

### HOSPITAL AUXILIARY TO GIVE CARNIVAL ON DECEMBER 7

Ladies of the M.S.A. Women's Auxiliary are setting as their objective between now and the end of the year, the raising of \$300 for the assistance of the local hospital. At a meeting of the executive committee, held last Wednesday, a novelty carnival was decided upon as the Auxiliary's first event, to be held on December 7 in Jubilee hall. Candidates for "Queen of the Carnival" will be invited to participate in this event, their votes to be regulated by sales of tickets. Mrs. Laith, Mrs. Wilson, Mrs. Coultas and Mrs. Downie were named a committee to arrange the carnival.

The Auxiliary reports an active membership of thirty-five.

### Complains That City Men Are Corraling Best Duck Hunting

Two choice duck-hunting areas adjacent to Goose Lake, Sumas Prairie, have been leased by Vancouver men, who employ a caretaker to regularly put out grain for the birds, and keep out trespassers. In this way, these moneyed shooters ensure for themselves plenty of 'sport' at week-ends, or other times they feel inclined. As the operation of a game preserve in this manner costs them considerable money, these sportsmen doubtless consider they are justly entitled to monopolize for themselves the best duck-hunting. And they get it, for the birds are not to be found in the usual ponds and sloughs, but mostly frequent, despite the periodical slaughter, the places where they are fed with barnyard regularity.

Feeling among local sportsmen—which category includes many farmers whose fields have provided sustenance all summer for the feathered game—ranges from mild disapproval to indignation over what they consider unsportsmanlike methods opposed to all game conservation principles. The northern birds are not "in" yet, and the resident hunter finds to his disgust that the Sumas prairie ducks are pretty well corralled by outsiders, who apparently prefer potting at semi-domesticated birds in the privacy of their exclusive preserves, instead of hunting the game, and chasing their luck with ordinary nimrods.

One well-known Sumas farmer, whose land adjoins a "club" reservation, complains to the News about the alleged arrogance of some outsiders. The farmer had as guest during October 14 Mr. H. Lowry of Bellingham, who, in trying a shotgun at target-practice, aroused the ire of a city club member, who accused the American of disturbing the partly-tamed birds in a "reserved" pond. The altercation led to blows, the American was insulted and assaulted, and so the report goes, retailed in good measure.

Sumas Game Protective Association expressed a definite stand in this matter recently, and forwarded a recommendation to the B. C. Fish & Game Protective Association, disapproving of the feeding of migratory game fowl before and during the hunting season for the purpose of decoying birds into easy shooting. Indicating that such methods are opposed to game conservation, the resolution was strongly worded and forwarded to the provincial organization, but to date no action has resulted.

### ABBOTSFORD

Jubilee Hall was used for its first real "old-time" dance on Friday night when the True Blues and Orangemen and their friends, numbering well over 200, turned out and had a jolly time. Owen's orchestra and a lusty "caller" proved an ideal combination, and also showed that dances of former days are still remembered, and becoming as popular as ever. Door receipts totalled \$103 and the cloakroom netted about \$20. Mrs. Mouldy was convener of the event.

Mr. and Mrs. R. McCrimmon returned to Abbotsford from Wenatchee, Wash. last week, Mrs. McCrimmon being completely recovered from her recent sickness. They came home via the Columbia River highway, and were delighted with the scenery of the 700-mile trip.

Mr. Atkins of Vancouver is a guest of his son and daughter-in-law, Mr. and Mrs. H. L. Atkins, the Atangard.

Now read some of the advertisements. You will buy judiciously—and save money.

### ABBOTSFORD

Mr. and Mrs. W. G. French have returned from Chilliwack for a time, and are residing at the Mulrend Lodge. Mr. French joins the Abbotsford staff of Brett's Ltd., while Mr. Miller, local manager, gives more time to the sales department.

Mr. W. Elliott of Vancouver has purchased Mr. Little's house and farm, and is having the buildings redecorated and painted.

Mr. and Mrs. Bond have returned from a holiday spent in Lacombe and Edmonton, Alta.

Mrs. J. O. Trethewey has returned from California, where she has been holidaying.

Mr. G. McCulloch of Ruby Creek, formerly of the local C.P.R. staff, visited at the home of Mrs. Downie last week.

Anglicans and their friends desiring to contribute to the forthcoming bazaar to be given by St. Matthew's W. A. are requested to leave their donations at the Vicarage.

### Huntingdon School May Not Be Rebuilt On Former Site

Representing Sumas School Board, Trustee E. H. Boley and Secretary E. B. McPhail visited the Minister of Education in Victoria last week to request some assistance to rebuild the Huntingdon school, recently destroyed by fire. They were practically assured assistance to the extent of \$1,000.

While so far as is known at present, the new school will be erected on the old site, prospects of consolidation in the near future have created a diversity of opinion among interested rate-payers over the location, some favoring Huntingdon village. A public meeting is being called by the Board to discuss this matter.

The Huntingdon school building cost approximately \$7,000 to build and \$1,000 to equip. The insurance carried was \$3,000.

Trustee P. H. Dawson accompanied Messrs Boley and McPhail.

Archie Johnson and Dr. Graves of Sumas, and Jim McLean of Huntingdon each secured a deer in the local woods last week.

### Poultry Fancier Learns By Competition Correspondent Writes

Writing from Mission, Mr. W. Chell corrects a prevailing local misunderstanding of the dates of District 4 poultry show, which is set for November 14, 15, 16 in Mission, and thanking us for space in boosting the event. He also calls us to task for confusing the dates.

Mr. Chell says there is not a show on the Pacific Coast offering such valuable prizes, with special prizes in almost every class. District Four show belongs to Maple Ridge, Mission, Clayburn, Abbotsford and Chilliwack, and a good entry is expected from Abbotsford. "It is my contention," Mr. Chell writes, "that if a bird is not worth preparing, it is not worth showing, and the fancier who devotes his time preparing and getting his bird in show condition, and then gets beat at the show, learns something for his trouble, and it is only by placing our birds alongside better ones that we can see the points lacking in our own. There is a possibility of this show being held at some other place next year. It may be at Abbotsford, and you may rest assured that wherever the show is held it will receive a good entry from Mission."

### Want S.S. Skeena On Run Again

New Westminster Board of Trade has appointed a committee consisting of H. M. Streight, G. E. Gilley, and Valentine Quinn to further efforts to have the freight service of the S. S. Skeena on the Fraser river resumed. The steamer has, for many years, carried freight to points not touched by a railway, and requests have been received from many points along the river urging that the service, which discontinued with the recent death of the ship's master, be resumed.

Mr. and Mrs. Barazzuol of Sumas Prairie are moving to Vancouver to reside. Their farm, adjoining the A. Campbell place, is being rented to an Alberta family by Mr. Waddell, the owner.

Sumas voters' list will be swelled by the addition of some 20 householders' names this year, residents, many of whom have not bothered to ensure for themselves a vote heretofore. Another indication of a lively municipal contest in Sumas soon.

A. C. O'Neill, former immigration inspector at Huntingdon, now at Blaine is being transferred to Victoria for a few weeks. His family resides in Sumas.

Mrs. S. J. Watson and children visited at the Sunnyside Farm on Sunday. Miss Evelyn Watson has returned home from Sardis.

Mrs. M. Davis of Huntingdon has rented Mr. W. Taylor's house, Yale road.

N. E. Curtis, formerly of Huntingdon, passed away in Seattle last week. Lynn Curtis and Mark Curtis attended his funeral.

Mr. and Mrs. B. Brown of Anyox are visiting the former's parents, Mr. and Mrs. H. R. Brown.

### Abbotsford Merchant Visits Nanaimo Herring Saltery In Which He Holds Interest

As one of the directors of the Pacific Coast Fish & Cold Storage Co., Ltd., H. P. Knoll made an inspection visit to the company's saltery at Nanaimo last week, where he found the staff bustling with a heavy catch of herrings just unloaded. The Pacific company, which was organized three years ago with a capitalization of \$250,000, operates five power boats and six scows, in addition to which it has other vessels under charter. One of the most valuable pieces of equipment the concern owns is a net, over half a mile in length, and averaging 400 feet in depth. Twenty-five fishermen are engaged by Mr. Knoll's company, and 25 men in the saltery.

Over 500 tons of herrings had been packed since October 15 by the Pacific company at the time of Mr. Knoll's visit, and a heavy catch is anticipated for the entire herring season, which continues for at least another two months. Most of this fish pack is sent to China, the preserving process being very simple. Immediately on being unloaded from the scows, the herring, without gutting, are spread in layers, sprinkled in salt, then scooped up by shovels into the crates, lids nailed down, projecting fish trimmed off, and despatched to warehouse or boat for shipment. British Columbia herring is a delicacy in this form among the coolies of Hong Kong and adjacent district, and the Chinese market is a profitable one.

Other members of the Pacific Coast Fish & Cold Storage Co. directorate are C. Athans, J. Athans and Mrs. C. Athans of Vancouver, and J. McDonald of Powell River.

### Teaching Staff Complains That Abbotsford School Overcrowded

At the request of several readers, the News publishes hereunder a report of proceedings of the Abbotsford School Board meetings since the annual meeting, as taken by excerpts from the minute record.

Meeting held July 13 in Village Corporation office, Trustees Pratt, Webster and Mrs. H. J. Fraser present. G. F. Pratt named chairman of the Board for the ensuing year, and E. Webster as secretary at usual salary. Accounts passed: Daily Province \$2; A. S. M. News \$8.75; Village of Abbotsford \$2.00.

Letter read from Miss Nelson, requesting an increase of salary from \$1,000 per year to \$1,200. Moved that an increase of \$50 per year be given to all public school teachers on staff, not receiving maximum, and who return to Abbotsford school in September. Moved that Mr. Topper be appointed principal of the high school at an annual salary of \$1,800, and that Mr. Walsley be appointed his assistant at a salary of \$1,400 a year.

Moved that the janitor, Mr. Walters be given an increase of \$5 per month. Secretary instructed to call for estimates for painting school. Special meeting July 31. Tenders opened for school painting as follows: N. Olund, body of school \$276; roof \$160; A. R. Gosling, body of school \$360; roof \$145; J. E. Parton, \$485. Work let to Contractor Olund.

Regular meeting September 4. Accounts presented: B. C. E. R. \$2.00; A. L. M. & D. Co., (wood) \$54; Clark & Stewart \$121.87; Terminal Map Co., \$198; Insurance \$456.00; water service \$2.00; W. H. Hudson \$8.05. Regular meeting, October 10. Bills presented: J. Gilmour \$128; water service \$2.00; W. H. Hudson \$18.40; N. Olund \$436; Terminal Map Co. \$198; W. Roberts (plumbing) \$49.05; C. C. Snowden, janitor supplies, \$38; Ireland & Allan \$23.63.

Public School Principal Stewart and other members of the teaching staff attended the meeting, pointing out that the school is overcrowded. As a temporary arrangement, the Principal was requested to re-grade the classes to the best advantage.

### ABBOTSFORD

Nine tables of whist were played in the Masonic Hall last Thursday evening, when the Eastern Star order gave the first of their series of three drives to be held this winter. First prizes were won by Mrs. Onions and Mr. Ed. Burns, consolations going to Mrs. Rosie and Mr. Switzer. Dancing and refreshments followed the games.

The local St. Andrew's Society plans to hold its annual St. Andrew's night social and entertainment in Abbotsford on Friday, November 30.

Pupils of Abbotsford High School held a social evening in the Masonic Hall on Friday, when songs by Misses Jennie Stobbs, Vera Bedlow and Flossie Hunt, with games and music, provided a happy program.

Mr. E. Mann arrived in Abbotsford last week with one of the latest type trucks, an 8-ton Godfredson. It is a most formidable machine, with four-rear-wheel-drive, 7-speed transmission, and develops 100 h.p. Being fitted with pneumatic tires on all six wheels, combined with enormous power, the vehicle is capable of sustained high speed, is as comfortable-riding as a light car, and has a well-built, richly-upholstered cab. Mr. Mann will use this big machine until he gets delivery of a smaller model of the same make. Weir's Garage have taken the Godfredson truck agency here.

Miss Jessie Coogan visited her parents here on Wednesday.

Mr. and Mrs. Wall are moving to Vancouver, where Mr. Wall has secured a position in the B.C.E. freight department.

Miss Valley visited Mrs. T. McMillan on Sunday.

Mrs. Leslie Mackie of Sumas Prairie has just returned from visiting her mother and friends at Enderby, B.C. Miss Edna Dockstader, a niece, returned with her.

Abbotsford badminton club will play in Jubilee hall every Monday and Thursday evenings, three courts being prepared. Mr. H. L. Atkins is president of the organization.

Mrs. Buchanan of Lynn Valley visited her parents, Mr. and Mrs. Lee, at the week-end.

### NELLES HOME DAMAGED BY FIRE

Fire, started by a faulty chimney, broke out in the residence of Mr. and Mrs. M. J. Nelles, Sumas Prairie, last Saturday, but was suppressed with the assistance of neighbors before much damage was done. The interior of one room was scorched and damaged by water, and a number of windows broken. The furniture had been carried to safety outside the building.

Sumas fire brigade, as in other fires near the border, turned out promptly with their chemical engine, but were not required, the flames being suppressed before their arrival.

Mr. and Mrs. Nelles have moved into the former Boley residence nearby, which property they recently acquired.

### POLICE COURT

Joe Jenova and Joe Lipartiti of Straiton were fined \$10 and costs each in Abbotsford police court for hunting on Kligard Indian reservation.

Marcus Hansen of Matsqui paid \$10 and costs into police coffers for disorderliness. Marcus, the police said, while bolstered by a few drinks, tried to emulate his Roman namesake's warlike ways.

Chas. A. Morrison of Vancouver was given a yellow card and fined \$10 for dangerous driving on Vye road. He contested the charge, assisted by his solicitor, in the Abbotsford court on Thursday, but police evidence was sufficient for conviction.

### POPLAR

A children's social was held in Poplar community hall last Friday, about 40 little folks enjoying the program. The artists were: Mr. Duncan Bell, pianoforte solos and comic songs; Mr. Allan Welch, accordion solo; Mr. Nicolson, accordion solo; Mrs. Heywood and Mr. Moses, vocal. The party came to a close with refreshments and singing.

Mr. Deninew of Poplar is building an addition to his house.

Clearbrook road is being opened east to Dennison road, providing a new road to Abbotsford.

Mrs. N. Prasloski is visiting with her father for a short time.

Mr. and Mrs. Fossett visited Mr. and Mrs. T. McMillan on Sunday.

Chilliwack district's sixth annual plowing match is to be held in John Murray's field, Prest road, near Yale road, on Saturday, Nov. 3.

Now read some of the advertisements. You will buy judiciously—and save money.

Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many decades of the past has been inclined to regard the scientist as hopelessly impracticable, a dreamer, a faddist. Within more recent years marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great universities of the world, and to Governments must be credited in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free wrote: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources; yet the surprising fact is not only that these resources are unexploited, but that only a small fraction of them have been put to work. Not a tenth of the facts that scientists know are being used. The rest of them lie idle in the heads of professors or in the unread pages of scientific books."

Som years ago a gentleman named Dudley became a chief chemist of one of the large American railways. He devised methods of testing coal and coke and lubricating oils, and saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He suited the available water supplies to the engines, and saved millions of boiler tubes from being burnt out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railways have saved more money than all the railroad wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potato industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, but if they piled it up anywhere the rain always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash—that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potato industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist built an electric apparatus which collects these poisonous particles out of the smelter smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches, in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the wealth of the whole irrigated region.

In Saskatchewan a clay-working industry was having trouble with its raw products. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust in wheat and other parasites, the removal of moisture from wheat without impairing its milling and baking qualities—these and other important subjects are receiving the attention of the scientists of Canada, and their solution will mean hundreds of millions of dollars to the farmers of the Dominion.

All of which only goes to demonstrate that every industrial interest in Canada, whether it be in the manufacturing class or in the work of production from the farm, the mine, the forest or the fisheries, should strongly support the present move for larger and more extensive research work in this Dominion. And of all classes, the farmer will probably prove to be the greatest gainer.

**Humane Society Awards**  
The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Brooksby, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterton Lakes, Alberta. Parchment certificates, Howard Mayers, White Rock, B.C.; Mary and Victoria Barrowman, Kaslo, B.C.; and W. H. Hepher, Powell, B.C.

**Alberta Crop Yield**  
It is estimated that the crop yield for the southern portion of Alberta will amount to 40,000,000 bushels. It has been estimated that the total yield for Alberta will be in the neighborhood of 200,000,000 bushels, but some officials say that 180,000,000 bushels will be the extent of the yield.

The chap who is always trying to take things easy, usually has a pretty hard time.

Oil is obtained from coal in a plant now in operation in Germany.

**Shampoo Yourself With Cuticura Soap**  
Anoint the scalp, especially spots of dandruff and itching, if any, with Cuticura Ointment. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A healthy scalp usually means good hair.

Each of the continents has one or more towns bearing the name of Rome.

**Will Continue Confederation Train**  
As a result of the great increase in winter travel between Ontario and the prairie provinces, the "Confederation," the Canadian National Railway, passenger and express which now runs between Toronto and Vancouver, linking these cities with Brandon, Regina, Saskatoon and Edmonton will operate as far west as Edmonton until January 5.

**New Match Company**  
The Columbia Match Company of Canada has taken out a Dominion charter with the purpose of acquiring control of the Columbia Match Company of Cleveland and of erecting and operating a plant in Montreal.

Bing: "What! You and your wife never quarrel?"  
Wing: "Well, we haven't quarrelled for three weeks."  
Bing: "How's that?"  
Wing: "We're not on speaking terms."

Each of the continents has one or more towns bearing the name of Rome.

Honor For Lost Fliers

Monument On French Coast Dedicated To Memory Of Nungesser and Coli

A monument honoring the memory of Captain Charles Nungesser and Captain Francois Coli has been dedicated at Etretat, where the French airmen left the coast of France on their ill-fated attempt to fly to New York more than sixteen months ago. It bears the inscription: "To the First Who Dared."

At the base of the column, which resembles an obelisk, are marble figures, three times life size, representing the two fliers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coli in their plane "White Bird" passed on May 8, 1927, before they disappeared in the west. On the front are engraved the words: "Nungesser and Coli, May, 1927." The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

Thin blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following case will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.Y., says:—"With a feeling of gratitude I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down, and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak nervous person will be benefited by my experience."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Drawback To Ocean Service

Airplanes Forced To Take Fuel For Entire Trip

Sir Eric Geddes, chairman of Imperial Airways, Ltd., states a scheme to establish an air service between England and India is now being organized, and it is hoped that within 18 months machines will be taking passengers from England to Karachi in five or six days.

On the subject of trans-Atlantic flight Sir Eric said an ocean service was not now commercially possible, for whereas on the projected Empire service the machines could be re-fueled at intervals, the trans-Atlantic flyer had to take all the necessary fuel with him.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Speeds Up Atlantic Mail

Canadian Air Service Cuts Days Off Former Schedule

Canadian air mail to Europe will save one to four days by air service from trans-Atlantic steamers, the department of commerce announces. Contracts for the new service have been let by the Canadian post office department. British mail to Detroit and the western United States, routed via Canada, would be speeded up under the plan.

Steamers arriving in Canada are met at Rimouski, a town on the St. Lawrence River. The letter mail is taken off and sent by aeroplane to Montreal, Ottawa and Toronto. Western mail is carried as far as Toronto and from there sent on by train.

Mail destined for European points is placed on the steamer at Rimouski and in some cases connections are possible which save three or four days, since such an interval between steamers frequently occurs.

Schwartz: "Vare iss you working now?"  
Krause: "I'm working in der zink mine."  
Schwartz: "Der zink mine?"  
Krause: "Chess, Press one button and you come up—press anodder button and you zink!"

An anti-aircraft shell, thought to be live, was unearthed by workmen excavating the roadway at Queen's Gate, Kensington Gardens, in London.

Minard's Liniment—Popular for 50 years.

Transform Cadillac For Railway Service

Canadian Pacific Uses High Power Sedan For Inspection Work

A high power Cadillac sedan specially equipped with flanged steel tired wheels has just been issued from the Angus shops of the Canadian Pacific Railway at Montreal for the use of the Engineering Department of the company. Capable of travelling on the rails at as great a speed as upon the road, the machine will be used for inspection trips on C.P.R. lines throughout the country. Service conditions are harder on the tracks for braking, and there are three systems on the car; the ordinary foot brake operating on the rear wheels, the conventional emergency brake, and a special supplementary brake applied by turning the steering wheel, acting through brake-shoes on the front wheels. The axels have been changed, the front axel being rigid and more rugged, and the rear axel, instead of being mounted in conjunction with the differential, has had the differential removed and replaced by a one-piece alloy steel axel. This is driven by a single gear with a ratio of 4 to 1, in place of the ordinary differential ratio of 4 and ten elevenths to 1.

The wheels themselves are of special design and are equipped with rubber insulation between the steel tyre and the wheel centre in order to deaden shock at rail joints, switch points, diamonds and crossovers. The lighting system, moreover, has been supplemented to comply with railroad regulations.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improvised in other parts of Canada.

**A Household Medicine.**—They that are acquainted with the sterling properties of Dr. Thomas' Eclectic Oil in the treatment of many ailments would not be without in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Automatic Gear Shifting

New Device Developed In England To Solve Motor Troubles

The London Daily Mail says that a "motoring development of first rate importance" in the form of an automatic gear-shifting device has been adopted by one of the leading British manufacturers after successful tests over 50,000 miles.

By this device a driver moves a pointer on a quadrant on his steering wheel to the desired speed designation, steps on a pedal, and the gear changes automatically, smoothly and silently."

Radio May Control Street Cars

Radio experts prophesied a day when street cars and aeroplanes would be operated by distant radio control, following a demonstration at Chicago in which a surface car was operated by wireless from an automobile.

Minard's Liniment for sprains.

Among the arms, munitions, etc., which Germany has either handed over to the Allies or destroyed are 14,000 aeroplanes, 315 submarines, 82 torpedo boats, 6,000,000 rifles and small arms and 107,000 machine guns.

A geographical mile is the length of one minute of latitude.

SUMMER COMPLAINT Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

**D'FOWLER'S EXT. OF WILD STRAWBERRY**

and after she had taken a few doses she was relieved. I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1753

WOULD ELIMINATE LEVEL CROSSINGS

Important Announcement Is Made At Meeting Of Good Roads Association

Regina.—Elimination of the double crossing over railroads on the main highways of Canada is forecast by an announcement made to the Canadian Good Roads Association in convention at Regina by Hon. T. C. Norris, recently appointed to the Board of Railway Commissioners.

Mr. Norris's statement was to the following effect:

1. That the Board of Railway Commissioners will give a broader interpretation to the act respecting the railway grade crossing fund.

2. That by legislative enactment at the last session of the Dominion Parliament the board may utilize forty per cent. of the total amount of the fund up to \$100,000.

3. That the board will work in conjunction with all organized bodies in the direction of development of good roads and the removal of the level crossing.

Mr. Norris stated that because of an amendment to the act respecting this fund made last session it is now possible for the board to associate itself with railway companies, governments and recognized organizations in the direction of road development in the doing away of double crossings generally by being in the position where it deems it right and proper, of contributing forty per cent. of the cost up to a maximum of \$100,000.

"What this really means," said Mr. Norris, "is that there are three pay bosses. When you can divide the expenses of diverting main highway traffic from these double crossings, building subways and overhead bridges to avoid these terrible level crossing accidents, between the railways who have been always very fair and anxious to co-operate with the local government and the board, you have three pretty good pay bosses and we should not leave any danger at any when you have three organizations like that co-operating."

Unusual Linen Cloth

Design Woven Into Border Shows Scenes In Canada

We read recently of a novel white linen table cloth that is something entirely new. The keynote of the design woven through the fabric, is "Canada." Fragments of north scenes, the Muskoka district, with the reflection caught right into the cloth of pine trees and little lakes, great antlered moose, fearsome-looking bears, and then the Parliament buildings at Ottawa, the shrine at St. Anne de Beaupre, crests, maple leaves, and the design is created so cleverly that it borders the cloth most effectively. The finest quality of Irish linen has been used to fashion this unusual cloth.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Entertained War Veterans

Belgium Honors Badly Wounded British Soldiers

Forty disabled British ex-soldiers were recently the guests of the British Disabled Soldiers' Association, Antwerp, who asked the British Legion to select a party of the most badly wounded men in Britain for a ten days' tour in Belgium as an indication of Belgium's admiration for, and gratitude to, the British Army.

The whole of Belgium's official life was represented in this feting of British heroes, who were selected by the Legion irrespective of social standing or rank. Some were so badly disabled that the War Office had sent with the party a detachment of the R.A.M.C. to attend to them on the journey. Practically all the men had lost limbs.

Why They Laughed

An eminent religious minister who was spending the summer in the Scottish Highlands was invited to baptize the infant son of a local minister. When the time for the ceremony arrived the guest gave out for congregational singing a paraphrase much favored on such occasions. "Let us," said he, "sing from the fifth paraphrase, beginning at the second verse. 'As sparks in close succession rise.'" To his consternation, the congregation giggled. Afterwards, asking the clerk what he had done wrong, he was told, "You must know, sir, the minister's name is Sparks, and yonder is his tenth bairn!"

Speaker (as turnip hits him full in the chest): "I notice, gentlemen, that one of my political opponents appears to have lost his head."

"What sort of face powder does your mother want, my girl?"  
"Anyfink wot will cover up a black eye, sir."

Minard's Liniment for aching joints.

"Well, Polly, how do you like your new teacher?"  
"I half like her and I half don't like her. But I think I half don't like her."

To salute with the left hand is a deadly insult to Mohammedans.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities. Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabastine.

**SEND FOR FREE BOOK**  
Canada Gyproc and Alabastine Limited, Winnipeg, Canada  
Please send handsome free booklet, "Walls that Reflect Good Judgment," which contains valuable information on Gyproc for farm use.

GYPROC Advantages for Farm Buildings

- Easy to use.
- Low cost.
- Workable as lumber.
- Cannot warp, bulge, crack, shrink or burn.
- Takes any decoration.
- Resists heat and cold.
- Vermis proof.
- Eliminates repairs.
- Protects your stock.
- Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings.
- Especially suitable for converting attics and basements into extra rooms.

**"EMPIRE" GYPROC Fireproof Wallboard**

Seed Cleaning Station

New Government Station At Saskatoon To Be Ready For 1929 Crop

Dr. J. H. Grisdale, Deputy Minister of Agriculture at Ottawa, following a visit to Saskatoon, stated that it was the intention of the Federal Government to establish shortly at the latter city a seed cleaning station similar to that operated at Moose Jaw, and that he hoped the new station would be operating in time for the farmers to take advantage of it for the 1929 crops.

Bienfait Lignite Coal

Approximately half a million tons of coal were produced from the Bienfait lignite coal fields last year, and it is expected that a similar amount will be dug during the coming winter months.

Ballplayer: "We gave the umpire fifty bucks to let us win the game."  
Friend: "And still you lost?"  
Player: "Yeah; the umpire was crooked."

People seldom improve when they have no model but themselves to copy after.

To Serve One Customer

Paris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently.

Si Moulay Hemada, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour, in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods, while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Little did our grandparents think the day would ever come when the steering wheel would be the family circle.

Happiness and misery are the names of two extremes, the utmost bounds whereof we know not.

**FOR COLDS**

**BAYER**

**ASPIRIN**

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

**Physicians prescribe Aspirin; it does NOT affect the heart**

Aspirin is the trade mark (registered in Canada) indicating Bayer manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

## Diamond Jubilee Committee Issues Official Commemorative Medal of Beautiful Design

One of the final tasks of the National Diamond Jubilee Committee, which arranged the celebration last year of the Sixtieth Anniversary of Confederation, has been the preparation of an official commemorative medal. The records of 1867 showed that the government of Sir John A. Macdonald issued a medal commemorating the confederation of the provinces. This medal, which was designed and struck in England, showed on the obverse the effigy of Queen Victoria and on the reverse a group of five figures symbolizing the original provinces of the pact of confederation. In designing a medal commemorating the Diamond Jubilee, the National Committee decided to show on the obverse an effigy of His Majesty King George V. and on the reverse a single figure which would in some measure represent the spirit of unity and strength which has been developed in Canada during

those of Cook and Vancouver. The whole is surmounted with the Latin motto from the Canadian coat-of-arms, "A mari usque ad mare."

The National Committee is happy to acknowledge the splendid co-operation of the London and Paris mints in the production of the original dies of this medal. The dies arrived in Canada early in August and the work of striking the medal is proceeding at the Royal Mint in Ottawa. The medal is three inches in diameter—one of the largest ever handled by the Ottawa Mint. All the metal used is from Canadian mines and the medal is thus a happy combination of British, French and Canadian artistic and technical effort.

The committee has ordered gold medals to be struck for His Majesty the King, for His Excellency the Governor-General of Canada and for the Prime Minister of Canada. Gold medals will also be presented to

the last sixty years. A number of mites in working out its idea and a Canadian artist assisted the design of Mr. C. W. Jeffreys of Toronto was finally adopted as expressing most accurately the views of the committee. The general idea conveyed by this design was afterwards translated in his own original way into medallion art by the eminent sculptor and engraver, Mr. Raymond Delamarre, of Paris, France.

Illustrations of the medal reproduced herewith show a new effigy of His Majesty King George V., which is the work of one of the foremost British artists, Sir Bertram Macken- nall. The reverse shows a figure which admirably typifies the qualities of youth, energy and confidence in the future. By its position, facing the Atlantic, from which blows a strong invigorating breeze, there is a suggestion of the cultural origins of our people and of the ideals of liberty and justice inherited from overseas. The figure stands on a pedestal bearing the dates 1867-1927. Surrounding the pedestal are sheaves of wheat and wreaths of maple leaves and in the background a map of Canada. In the upper part of which the shield from the Canadian coat-of-arms appears. On the Atlantic side of the map are the names of the first discoverers, Cartier and Champlain, and on the Pacific side

### Manitoba Fisheries

#### Organization Meeting Held To Place Industry On A Firm Footing

At a meeting of the Manitoba Co-operative Fisheries Limited, attended by more than 100 representative fishermen from Lakes Winnipeg, Manitoba and Winnipegosis, plans were completed to place the industry on a basis where the fishermen will share to a greater extent in profits made in the business. Suggestions were made to appoint agents at Chicago and New York. Last year Manitoba produced 18,000,000 pounds of fish and those who belonged to the organization were responsible for a catch of about 7,000,000 pounds.

#### That Proved It

The clubman, who had dined not wisely but too well the evening before, met the milkman distributing bottles. The following colloquy took place:

"A fine morning."  
"A fine morning."  
"It is, is that today's milk you are delivering?"  
"Yes, sir. Absolutely."  
"Thanks. Now I know it's tomorrow."

#### Brandon's Broadcasting Station

Brandon's first broadcasting station has just gone into daily use, and a studio will give grain and stock reports each day, and once a week, in the evening, will broadcast local concert programmes.

"I read your remarkable article. In fact, I read it three times."  
"You flatter me!"  
"Not at all. Even now I don't understand it."—Pele Mele, Paris.

W. N. U. 1753

### China Had Monopoly

#### Of Paper Industry

#### After Eight Hundred Years Secret Was Stolen by Arabs

Paper making was a purely Chinese industry for some 800 years. The secret was eventually stolen by Arabs, who substituted cotton rags for mulberry leaves. No more wood was used in paper manufacture until the 19th century. A quaint little volume dedicated to George III. was printed in London in 1800. Most of the pages of the book were made of straw. A note on the frontispiece said: "The following lines are printed on paper made from wood alone, the produce of this country, without any intermixture of rags, waste paper, bark, straw, or any other vegetable substance." What wood was used or what process employed, is not known, but it is now historically conceded that paper was made from wood pulp forty years before the ground process was officially discovered. The art of printing is said to have existed in China about 50 years before the Christian era.

### Iceland's First Settlers

#### Supposed to be Irish Monks, But Real History Began About 870

Only about one-fourth of Iceland is habitable. The population of the island is about 85,000. No traces of an early aboriginal race have been discovered. The first settlers are supposed to have been Irish monks who landed on the island about A.D. 800. The general belief is that these Celtic settlers had disappeared before Iceland was discovered by the Norsemen in 850. In any event, books, croziers and other articles found by the early Scandinavians prove that Irish monks had made an attempt to colonize the island. The real history of Iceland dates from about 870, when large numbers of Norsemen began to settle there, owing to political disturbances in Scandinavia.

Among the curious regimental pets belonging to units of the British Army at different times have been a chimpanzee, an ape, a lion, a sea-eagle, a cheetah, a black bear, and a lamb.

## Another Classroom on Wheels Appears

Education in these days is hard put to it to keep pace with civilization although the one is dependent upon the other. In the more remote districts of Canada, in particular, the cause of culture has a struggle to survive, and were it not for modern methods the rising generation in many parts would remain untaught.

Although agricultural communities enjoy the most modern educational facilities and the "little red schoolhouse" has assumed an increased importance and has considerably en-

Co-operating with the Ontario Department of Education, the Canadian Pacific Railway has evolved the school car, and late this summer issued from its Angus Shops the second especially prepared coach for this unique purpose. It is now operating in the district in Ontario lying to the west of Fort William and Port Arthur, while its predecessor is carrying on its duties as it has for some time past in Northern Ontario in the neighborhood of Cartier and Chap-leau.

The school car is equipped in every

larged its scope, other districts suffer by necessity from neglect. Outlying areas with a scattered population find inter-communication at best in summer time under the most favorable conditions difficult enough, but when winter closes down a partial paralysis is brought about. Such localities could not afford school facilities nor could permanent schools adequately serve the community, for during the winter season children could not travel with safety. This problem, which for a number of years remained unsolved, has been met at last by a singularly practical and effective remedy, the "school car."

way like the most up-to-date "little red schoolhouse," having a bright classroom with blackboard, regulation desks, maps, globe, school-books and so forth; a library of books for the students and adult visitors as well; and comfortable living quarters for the teacher. From the outside its appearance is that of a standard first class coach, but inside it has been entirely remodelled and especially protected and equipped to withstand the rigors of the coldest weather when left on a lonely siding.

The mobile schoolhouse solves in a unique fashion a vital and hitherto unsolvable educational problem.

### Making Test In Labrador

#### Experiments Under Way To See If Coast Can Be Made Productive

Professor Fred C. Sears of the Massachusetts Agricultural College is back after a trip to the Grenfell Mission in Labrador, during which he set under way an experiment which may convert the bleak coast of Labrador into a productive agricultural region.

Professor Sears was selected by Sir Wilfred Grenfell to serve on a Commission to conduct experimental work in agriculture for two years in an effort to determine whether vegetables and other agricultural products can be produced in parts of the world, such as Labrador, where the sun is too short for normal growth.

The mission has more than 75 head of cattle, but, as the season is short and tillable land scarce, there is difficulty in finding sufficient food. Experiments are to be made in methods of gardening, soil drainage and tillage, and various plants, shrubs and seeds will be sent there to determine their ability to grow.

Special efforts will be made to introduce red flowering plants, of which there are virtually none in that section of Labrador.

Dr. Grenfell believes there is a need for plants with red blossoms for their aesthetic value in the case of patients in the hospitals, and a large number of plants having red flowers will be sent to the mission gardener for early planting.

Professor Sears' trip covered about 1,500 miles this year. He plans to return next year and record the results of the first experiments.

### Large Percentage Of Water is Underground

#### Nearly One-Third Beneath Earth's Surface, Says Scientist

The quantity of water underground beneath the crust of the earth's surface is nearly one-third the total volume of the oceanic waters, says a scientist who has just concluded investigations of buried rivers and caves.

The earth's ground water has been accumulating for countless ages, and extends to great depths, perhaps six miles, and percolates slowly through the porous and jointed rocks, to form a great system of underground drainage.

### Potato Imports Drop

#### Export of American Potatoes to Canada Are Less

Exports of American potatoes to Canada have been cut to less than half of their total of three years ago, says a United States government announcement.

Last year the United States sent 479,596 bushels to the Dominion, against 919,783 in 1924. The increased production in Canada explains the drop, says the statement.

France is the only European country whose present birth-rate shows an improvement on the pre-war figure.

The main supply of rubber comes from hevea trees of the tropics.

### Heavy Hail Loss In Alberta

#### Over Four Million Dollars Paid Out In Claims

In addition to the heavy hail losses incurred by the hail insurance board of Alberta as previously announced, line insurance companies operating in the province have also suffered a net loss of about two million dollars. The total amount paid out in claims has been in the neighborhood of four million dollars. This, with the claims dealt with by the hail insurance board, brings the total amount paid out this season to more than four and one half million dollars.

Some of the insurance companies, it is stated, had been exceptionally heavily hit, as they carried a large amount of insurance in the districts that received the brunt of the big storm on August 11.

In face of the large losses last season and again this year it is considered probable that some of the companies will discontinue writing hail insurance in Alberta. Others again are taking their losses smiling in the hope that they will be able to recoup themselves next year.

### Valley Of a Thousand Falls

The name, Valley of a Thousand Falls, in the Mount Robson District, British Columbia, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman and participated in his attempt to climb Mount Robson.

"Ha-a-a! I am mad—mad!" ranted the tragedian in the dungeon scene.

Voice from the Gallery: "You ain't near as mad as us fellows that paid to get in."

### How They Got That Way

#### Demand For Postage Stamps Started Druggist Keeping Other Articles For Sale

In 1775 the well-stocked American drug store carried approximately 675 different items, and all were either remedies or articles confined to the medical field. Today you can walk into the average drug store and buy any of 7,000 articles ranging from eye-glasses through fishing tackle and books to radio sets.

How did the drug store get that way? Dr. Logan Clendenning, the medical writer, has set out to find the answer and he believes that the humble postage stamp was the germ of it all. The public found it needed postage stamps at all hours, he pointed out—and only the drug store was open.

"A number of factors have influenced the development of the pharmacy into a general store," writes Dr. Clendenning in the current issue of the American Druggist. "The most important undoubtedly was the long hours which the druggist was under obligation to keep. All the other stores shut at, say, 6 o'clock, but he had to keep open because people might need medicine at any hour."

"As the drug store was open when other shops were closed, people got the habit of dropping in at all hours to ask for this article and that—especially stamps. What was more natural or inevitable than that the store should gradually put in a supply of the articles asked for?"

"The stamp question is really the crux of the whole development."

### Different From English Way

#### Some Countries Have Queer Method Of Saying "Good-Bye"

Different races have different methods of saying "good-bye."

In the Philippines, for instance, a man rubs his friend's face with his hand when he bids him farewell.

When you leave a Hindu he falls in the dust at your feet, while the Burmese bend low and say, "Hip hip." South Sea Islanders rattle each other's whalebone necklaces.

The Othello Islander will twist the end of the departing guest's rope and then solemnly shake his own hand three times. The Japanese will take his slipper off as you depart, and say, with a smile, "You are going to leave my delectable house in your honorable journeyings—I regard thee."

The Sioux and the Blackfeet will dig their spears in the earth as a sign of confidence, while Fiji Islanders cross two red feathers.

### Human Power Plant

#### Psychologists Claim To Have Heard Messages From Nerves In Body

Human life has been revealed as a wonderful electric power plant and system of transmission lines.

Two experimenters in psychology say they have listened to messages flashed over the network of nerves in the human body, translating the impulses of nerve currents into sound waves that human ears can hear.

Impulses are detected by electrodes attached to the body. These nerve messages, magnified eight hundred times by a powerful amplifier, can be broadcast by wireless.

Every winter the state of New York has a battle keeping its roads open. To keep inter-city and interstate traffic moving, it must keep 15,000 miles of highway clear of snow and ice.

Policeman: "As soon as I saw you come round the bend I said to myself, 'Forty-five at least.'"

Lady Driver: "How dare you! It's this hat that ages me."

"The drunken driver must go," says a newspaper heading. That's just the trouble. He always does go.

### Nine in a Line

The distinction of being the point in the British Empire from which the largest number of bushels of grain are shipped direct from farm to rolling stock belongs to Vulcan, Alberta, on the lines of the Canadian Pacific Railway. Here is a view of the local elevators, nine all told, seven of which are of double capacity. Last year Vulcan shipped two and a quarter million bushels of grain, and indications are that it will exceed its own record this year.

## Mining Possibilities of Northern Manitoba and Saskatchewan Attracting Great Attention

### Permanent Link With World

#### Residents of Pitcairn Island To Receive Radio Transmitting Set

Isolated since birth, except when some friendly or storm-buffed vessel chose to visit them, the islanders of the small Pitcairn Islands will soon be able to talk with the world, for a Marconi wireless transmitter which has been presented to the islanders by the Marconi International Marine Communication Company, is now on its way out there and, when installed, will be a permanent link with the outside world.

Pitcairn Island lies in the mid-eastern Pacific Ocean, and was sighted by many sailing ships in the old days. Unlike the majority of islands in this region it is without coral reefs, but rises abruptly with steep and rugged cliffs of basaltic lava.

Recently a small group of islanders learned the Morse Code, picking it up from books that had been given to them by the Marconi operators on the ships that called at the island. In 1921 they obtained a simple crystal set and five years later received a Marconi type 31 ship's crystal receiving set, but on each they can only receive.

### British Settlers For B.C.

#### Block System Of Settlement Is Advocated By Premier

Premier S. F. Tolmie informed the Empire Parliamentary Association delegates and members of the Vancouver board of trade that the provincial government was prepared at any time to enter into negotiations for the placing of British born settlers on British Columbia lands.

"British Columbia was prepared to supply the land, administration, supervision, schools, roads, and her investment in railways," Hon. Dr. Tolmie stated.

The block system of settlement was advocated by the premier and he believed preliminary training could be given settlers in clearing settlement lands.

During the conference the feasibility of settlers going on the land in the Peace River district was discussed, but the settlement scheme embraced various sections of British Columbia.

**Parisian Simplicity**  
A slender one-piece dress achieves distinction through shirring, which gives a slightly fitting appearance at shoulders, and forms pockets at each side of front of skirt and adds flare to hemline. It is a youthful type that is becoming to most figures, and so entirely wearable and smart in materialized cashmere. Wool jersey, plain or printed, silk crepe, crepe satin, canton crepe, georgette crepe and sheer velvet, also adaptable. Style No. 259 is designed in sizes 16, 18 and 20 years, 34, 36, 40 and 42 inches bust. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The year 1928 will undoubtedly be a record one in the history of Canadian mining. The search for mineral deposits has been unequalled both for its intensiveness and for its breadth of activity. Never in any one year has so much money been spent in exploration as will have been spent this year. The operations are Dominion-wide but by far the most important are those that are directed to areas underlain by the Precambrian rocks of the northern parts of the provinces of Quebec, Ontario, Manitoba, and Saskatchewan, and of the Northwest Territories.

The most spectacular explorations are those that are headed into the more remote parts of the country east and west of Hudson Bay. When it was learned last winter that transportation to Flin Flon was to be provided, that that large ore-body was finally to be exploited, and that other large ore-bodies in northern Manitoba had been discovered, the Department of Mines, at Ottawa, was flooded with requests for information regarding that part of the country.

Then interest broadened and the possibilities of more remote areas were considered. It was felt that the completion of the Hudson Bay Railway to Churchill and the increase of boat transportation on the bay would render accessible a great stretch of country that had hitherto been regarded as Canada's hinterland. Then came the desire to be on the ground early and secure the best. The result is that a great many prospecting parties have left for these northern areas. The exploratory work is entrusted to hardy men of experience and knowledge. Some prospectors have gone to Hudson Bay by way of northern Ontario and northern Manitoba, others have left by boat from points on the Atlantic coast. One company alone has sent by boat ten parties of two men each and the necessary supplies. These will be assisted and directed by men sent in by aeroplane.

In the more readily accessible areas and in areas where transportation facilities are of the best, search for more mineral deposits is being prosecuted with feverish intensity. This takes the form of surface prospecting and of underground testing by diamond drilling, shaft sinking, and drifting. All this exploratory work has been given a powerful impetus by the discoveries centering on the northern part of the Manitoba-Saskatchewan boundary, the Rouyn area of western Quebec, and the Sudbury, Patricia, and other areas of Ontario, and it is expected that by the close of the year a very important addition will be made to the known and developed mineral reserves of the country.

### Distinguished Farmers

#### Wheat Pool Includes Amongst Its Members A Prince, Baron, Duke And Countess

The Alberta Wheat Pool now includes among its members a prince, a baron, a duke and a countess. They have between them a signed-up acreage of 10,000 acres, it was stated at the offices of the pool in Calgary.

These distinguished members are His Royal Highness, the Prince of Wales, Baron Rodney, the Duke of Sutherland, and the Countess de Foras. The latter, who has a farm at High River, has just signed up a contract for 350 acres with the pool.

### To Study Ancient Designs

The National Museum, Ottawa, will conduct a study of the ancient handicrafts and designs of French Canada, in order to determine the extent of their influence on the arts and crafts of the various Indian tribes. It is thought that many, if not most of the patterns in bead and silk work that appear on Indian specimens may not be aboriginal at all but copied from European patterns.

### Tourists Aid Development

The tourist is often the fore-runner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

That young Canadian sprinter from the West coast astonished the world. To beat the West in anything a fellow has to be speedy.

Young Lady: "Your novel has a charming ending."  
"What do you think of the opening chapters?"  
"I have not got to them yet!" — Lustige Kölner Zeitung, Cologne.

### Huntingdon Parents Do Not Favor Idea Of Sending Young Pupils To Whatcom Road School

A whist drive was given by Huntingdon P.T.A. last Friday to raise funds for replacing books and furnishing destroyed by the recent fire, which destroyed Huntingdon school. At the refreshment hour School Trustee Dawson referred to the assistance promised by the Department of Education in rebuilding the school. Enlargement of the school at Whatcom road for the accommodation of Huntingdon children had been mooted, he said, but the proposal was not favored by Huntingdon parents, who did not approve of small children having to be transported such a distance.

Mrs. Finlay and Mr. C. Caul won the whist prizes.

ABBOTSFORD KILGARD DENNISON

### ABBOTSFORD

Dan Emery, formerly of Abbotsford, and recently of Port Moody, has purchased a truck line operating from New Westminster to Vancouver. Mr. and Mrs. Emery now reside in the Royal City.

Mrs. Bedlow entertained at a birthday party honoring Mrs. Downie on Friday last.

Abbotsford's fire chief, C. F. Weir, and Constable Greenwood were two of the first to respond to the Nelles fire call.

Develop the habit of reading the other fellow's message and story—it's good business. And maybe he'll take the same trouble, and reciprocate your courtesy. How many are there who write merely for an audience which, perhaps like themselves, are concerned only with themselves?

Mr. and Mrs. Wallace, recent arrivals from Saskatchewan, have rented Mrs. McMenemy's house, Sumas road. Mrs. McMenemy is a guest of her sister, Mrs. A. Thompson.

A number of little girls were guests at a Halloween party in honor of Elma Rosie and Betty Haddrell, in the St. Matthew's Parish Hall last Friday evening.

The little girls made a pretty picture in their colorful costumes, several of them winning prizes. The evening passed happily in games dancing and refreshments.

One way of becoming unpopular is to commit the unpardonable crime of asking payment of an overdue account. The friendlier you are with the debtor the worse the crime.

### ATANGARD HOTEL GUEST LIST

Recent guests at the Atangard Hotel were:—Mr. R. Arnold, Mr. F. Begg, Mr. H. Findlay, Mrs. J. Patterson, Mrs. W. Vye, Mr. W. Mitchell, Mr. A. H. Mitchell, Mr. A. H. Manning, Mr. H. R. Aultrich, Mr. R. W. Whitman, Mr. E. G. Ralston, Mr. N. E. Shore, Mr. G. W. Hart, Mr. E. Rine, Mr. J. H. Roaf, Mr. C. E. Thomas, Mr. W. A. Slaney, Mr. W. Jones, Mr. L. Bain, Mr. E. A. Richardson, Mr. A. E. Davey, Mr. A. McMeans, Mr. C. E. Menon, Mr. O. H. Gernay, Mr. J. Mann, Mr. E. Woodside, Mr. J. G. Bell, Mr. E. Quinn, Mr. A. E. Marchant, Mrs. Egar, Mr. H. McKenzie, Mr. G. ### CLAYBURN

rs. L. Salmon is recuperating after her recent illness at the home of her parents, Mr. and Mrs. E. Wilkinson.

Mr. and Mrs. Duncan (parents of Mrs. Selton) have purchased the store at Ruskin, formerly owned by Mr. Hopkins. Mr. and Mrs. Duncan and Miss Margaret Duncan, moved to Ruskin, this week.

Mr. Adam Jack is in the district, renewing old acquaintances here. Mr. Jack worked in the brickworks when it first started.

Miss Assen of Vancouver, until recently a missionary in China, will be the speaker at the annual thank offering missionary meeting on Thursday afternoon, in the Clayburn church.

Mrs. O. Wilkinson who has been ill the past two weeks is much improved.

Mr. and Mrs. Callahan and family, C. P. R. agent at Clayburn station, have moved to Summerland.

### Sumas Co-operative Has Turnover Of \$52,000 For Season To Date

At a meeting of directors of Sumas Co-operative Association, held on Monday of last week, Secretary Plaxton submitted a preliminary statement showing that the organization's turnover for the past year amounted to \$52,000. About 100 tons of wheat were marketed, averaging \$40 a ton, and some 50 tons of oats, selling at \$28 to \$29. A quantity of timothy hay was disposed of at \$14.40, and some No. 1 clover at \$16. Barley brought \$33 a ton. Among other purchases, the co-operative bought sacks costing \$4,000, and twine to the value of \$1,200. Individual growers producing the largest quantity of oats were C. O. Hill and Blacklock Bros.

An audited balance sheet will be issued at the end of the year. Directors of Sumas Co-operative are J. F. Cook, C. O. Hill, E. H. Boley, N. Hill and C. A. Lamson.

L. A. LaPunle, Mr. J. W. Mutt, Mr. D. E. Hayser, Mr. A. F. Bennick, Mr. P. Edwards, Mr. Fred Higginbottom, all of Vancouver; Mr. and Mrs. C. J. Brue and Dorothy and Helen Brue, Mr. J. Tashe, Mr. Thos. Cestello, all of Everett, Wash.; Mr. Wm. Randolph Seattle; Mr. and Mrs. J. R. Robson, Prince George; Mr. R. J. McSwade, Portland; Mr. C. W. Dans, Seattle; Mr. D. D. Jirinson, Sumas; Mr. J. P. Devlin, Toronto; Mrs. W. E. Berry, Seattle; Mr. and Mrs. R. J. Foster, Seattle; Mr. W. I. Thomas, Renton; Mr. T. B. Morrison, Anacortes; Mr. D. W. Loweny, Bellingham; Mr. R. E. White, Bellingham; Mr. H. D. Goodman, Mr. A. Valson, of Blain; Mr. E. J. Smith, Bellingham; Mr. and Mrs. J. F. Judson Broun, Chicago.

### PAGE-MILLER

A wedding of considerable interest in the Matsqui and Clayburn districts took place in Clayburn United Church last Friday, when Miss Minnie May Miller, daughter of Mr. and Mrs. Conrad Miller, Fredrickton, New Brunswick became the bride of Mr. Wyvern Page, son of Mr. Hubert F. Page of Matsqui.

Yellow chrysanthemums, fall foliage with an arch of maple leaves, and a background of green provided one of the prettiest decorative effects imaginable for the ceremony, which was performed by Rev. J. H. White, M.A. The bride, given in marriage by her brother-in-law, Mr. J. Reid, was charmingly attired in a dress of white satin and lace, with veil and orange-blossom wreath, and carried a shower bouquet of ophelia roses and lily of the valley. Her bridesmaid, Miss Minerva "Page" wore a pretty dress of powder blue georgette. Miss E. Goodchild played the wedding march.

The groom was supported by Mr. Lloyd McIntyre of Chilliwack.

Following a honeymoon motor trip through Washington and Oregon, Mr. and Mrs. Page will reside at Ridgedale. The young couple are well and favorably known in Matsqui, the bride having taught school at Ridgedale. She returned last week from a visit to New Brunswick.

### MATSQUI

B. E. Ebbeson has returned to his home and will stay here for some time.

The Lutheran ladies will hold their regular meeting in the church parlors on November 7. Mrs. J. Hamilton is hostess.

Miss Jessie Paterson has gone to Vancouver, where she has secured a situation.

Miss H. Kempf returned here on Sunday evening after spending a few days with Mr. and Mrs. Torvig in Seattle.

Contractor Nels Olund is enlarging Mr. Forrester's home at Mt. Lehman, by building additional rooms. A water system is also being installed.

There is always a "come-hither style" to a window full of products that provide "that-reminds-me" hinges to an advertising campaign.

### Absence Of Cheese Exhibit Cost Matsqui \$50 And Third Place

A cheque for \$350 has just been received by Matsqui Agricultural Association from the Royal Agricultural Association at New Westminster, representing Matsqui's award as fourth prize winner in the district exhibit competition. Manager McKenzie of the New Westminster organization, in a letter, pointed out that had Matsqui included an exhibit of Devonshire cheese, as required by the judges, the cheque would have been for \$400, and Matsqui accorded third place.
